Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed January 25, 2004 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. The foreign reference JP-09-166135 was not supplied by applicant and/or not scanned into the record.

Specification

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

3. The abstract of the disclosure is objected to because the phrase "As shown in Fig. 1" can be implied. Correction is required. See MPEP § 608.01(b).

4. The disclosure is objected to because of the following item(s):

- a. The first paragraph of the Specification should include the cross reference to related applications, i.e., "This application is a 371 continuation of PCT/JP03/09058, filed July 16, 2003."
- b. The Specification refers to specific claims throughout. As an example, on page 4, the Specification states: "The invention described in claim 1....". However, the current claims may be amended or cancelled during the prosecution of the application.
Appropriate correction is required.

Allowable Subject Matter

5. Claims 1-22 are allowed.
6. The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, the prior art does not teach and/or suggest "wherein said second guide rail rotates centering around two said shafts supporting said second guide rail, sliding said indication bar along said first guide rail, said first guide rail rotates centering around two said shafts supporting said first guide rail, sliding said indication bar along said second guide rail, and said rotor rotates centering around said indication bar, sliding at least one said slider along said third guide rail."

Regarding independent claim 4, the prior art does not teach and/or suggest "wherein each of said second guide rail and said third guide rail rotates centering around two said shafts supporting said second guide rail, sliding said

indication bar along said first guide rail, said first guide rail rotates centering around two said shafts supporting said first guide rail, sliding at least two said sliders along said second guide rail and said third guide rail, and said rotor rotates centering around said indication bar, sliding at least two said sliders along said second guide rail and said third guide rail.”

Regarding independent claim 7, the prior art does not teach and/or suggest “wherein each of said second guide rail and said third guide rail rotates centering around two said shafts supporting said second guide rail, sliding at least two said sliders along said first and said sixth guide rail, each of said first guide rail and said sixth guide rail rotates centering around two said shafts supporting said first guide rail, sliding at least two said sliders said second guide rail and said third guide rail, and said rotor rotates centering around said indication bar, sliding at least two said sliders along said second guide rail and said third guide rail.”

Dependent claims 2, 3, 10-22 depend from claim 1.

Dependent claims 5 and 6 depend from claim 4.

Dependent claims 8 and 9 depend from claim 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

7. This application is in condition for allowance except for the following formal matters:

(1) Correction of the IDS and the (2) objections to the Specification.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
